STATISTICS

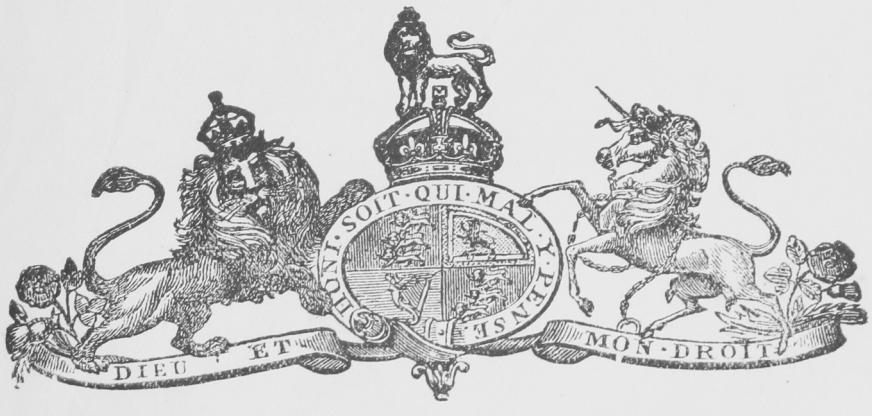
OF

THE STATE OF TASMANIA

FOR THE YEAR

1924-25.

COMPILED UNDER THE DIRECTION OF THE COMMONWEALTH STATISTICIAN BY THE TASMANIA BRANCH OF THE COMMONWEALTH BUREAU OF STATISTICS.



By Authority

JOHN VAIL, GOVERNMENT PRINTER, TASMANIA.

1926.

31402

EXPLANATORY NOTE.

THE present volume of Tasmanian Statistics contains:—

Trade and Shipping Agricultural and Pastoral Production Vital Statistics (Summary only)	Printed at Commonwealth expense.
State Finance Friendly Societies	Printed at State expense.

The other parts of the old volume of Tasmanian Statistics have been compiled in this office but not printed. The substance of them is included in the Year-Book and other Commonwealth publications, but more detailed information will be supplied on inquiry. It is hoped to make the next annual volume considerably more comprehensive.

L. F. GIBLIN,
Government Statistician and Deputy Commonwealth Statistician.

APPENDIX A.—STATISTICS OF TASMANIA FOR 1923-24.
[*Not Printed.*]

VITAL STATISTICS.

TASMANIA.

Fourth Quarter and Year, 1924.

THE YEAR 1924.

Summary.

For the years 1922, 1923, and 1924, births are allocated to the districts where the parents normally reside, and deaths to the district where the deceased had their usual residence. The rates are consequently true measures for the respective districts, except in so far as a district contains a hospital or infirmary where the inmates are permanent. The average district rates for previous years are adjusted so as to be roughly comparable with those for 1922, 1923, and 1924.

Births.

There were nearly 400 fewer births in 1924 than in 1923. The birth-rate for 1924 was 25·1, compared with 26·3 in 1923 and 27·1 in 1922. In 1923, there was a marked drop in births in the towns; in 1924 the country districts followed with a similar drop, while the town rate remained at the low figure. The birth-rate for 1924 is the lowest recorded since 1850; the previous low record (25·9 in 1919) was a direct consequence of the war. The drop in the country birth-rate was remarkably uniform in all parts of the State.

Birth-rate.

	1924.	1923.	1922.	1911-20.
Urban Districts	22·9	23·2	25·0	26·9 (*a*)
Country Districts	26·6	28·5	28·5	29·7 (*a*)
Tasmania.....	25·1	26·3	27·1	28·1

(*a*) Rough estimate.

Deaths.

Deaths in 1924 were 2123 (or less by 14 than in 1923), and the death rate, 9·9 per 1000 of population, was practically the same in both years, as the population had slightly declined. The death-rate in Hobart is affected adversely by the inclusion of the New Town Infirmary and Consumptive Sanatorium deaths, which should properly be distributed over the State. New Norfolk (included in Southern District) in the same way has an exaggerated death-rate, due to the Mental Diseases Hospital. When allowance is made on this account, the death-rate of Hobart is reduced to 10·5 per 1000, compared with 11·1 in 1923. But even these figures compare badly with the mortality rate in Sydney, which seems to have established a clear pre-eminence over other Australian capitals in matters of health.

The following table gives a comparison between town and country mortality in Tasmania after allowance is made for such institutions as those mentioned above:—

Deaths per 1000 *of Population.*

	1924.	1923.	1922.	1911-20.
Urban Districts.....	11·0	11·5	10·4	12·4 (*a*)
Country Districts	9·0	8·8	8·5	8·8 (*a*)
Tasmania	9·9	9·9	9·3	10·1

(*a*) Rough estimate.

On the average in the last three years mortality in the towns is 25 per cent. higher than in the country.

Natural Increase.

The natural increase for 1924 was 15·2 per 1000, compared with 16·4 in 1923, 17·8 in 1922, 16·7 in 1921, and 17·6 in 1920. This is the lowest rate of natural increase since Federation, but in the two years before Federation the rate was down to 13 and 14 per 1000. A remarkable feature in 1924 was that the natural increase in females was 200 greater than in males, while usually the two sexes keep very level in natural increase. This result was due to a combination of a relatively low proportion of male births with a proportion much higher than usual of male deaths.

Infant Mortality.

There were 296 infant deaths in 1924, compared with 326 in 1923. The infant mortality rate (55 infant deaths per 1000 births) was below the average, and lower than the rate for 1923 (58). The rate for pre-natal causes was 34 per 1000 births, and for other ("preventable") causes only 21·5 per 1000 births. This figure for "preventable" causes is a record for Tasmania; it is a little lower than in 1922, when it was 21·8 per 1000 births, and considerably lower than in any other year on record.

The difference between town and country in respect to "preventable" infant mortality is shown in the following table:—

Infant Deaths per 1000 *Births.*

	1924.	1923.	1922.
Urban Districts.....	25	32	25
Country Districts	20	21	20
Tasmania	21·5	25·4	21·8

Contrary to general belief, there is an even greater difference in favour of the country in respect to deaths from pre-natal causes. Taking the average of the last five years, the urban death-rate from pre-natal causes is 50 per cent. greater than the country rate, while for "preventable" causes the towns are only 35 per cent. worse. There has been practically no improvement in the death-rate from pre-natal causes for the last fifty years, during which the "preventable" death-rate has been cut down to less than one-third of its old figures. But the mere fact of the difference between town and country shows in itself that a considerable part of this mortality also comes properly within the category of "preventable" causes.

Still-Births.

There were 178 still-births in 1924, compared with 168 in 1923 and 187 in 1922. (Still-births are not included either in births or deaths.) The number of still-births keeps steady at almost the same number as deaths from pre-natal causes. If the two classes, which are to some extent cognate, were grouped together, they would account in 1924 for 66 deaths per 1000 live births, as against 21 per 1000 live births for "preventable" causes.

Causes of Death (Infants).

Of the 296 infant deaths, 180, or 61 per cent., were due to pre-natal causes. Stomach troubles were exceptionally low, accounting for only 17 deaths. This is less than half the number recorded in any previous year, and only one-quarter of the decennial average. Though a regular and plentiful rainfall and low temperature were probably the chief factors in this remarkable result, some share of the credit should no doubt go to child-welfare activities. Lung complaints were not so severe as in 1923, but still accounted for 46 infant deaths, compared with an average of 44. Infant deaths from the three chief causes were as follows:—

	1924.	1923.	1922.	1914-23.
Diseases of Respiratory System	49	57	37	47
Diseases of the Stomach	17	40	41	72
Pre-natal Causes	180	178	193	185

Causes of Death (General).

As usual, heart-disease accounted for the greatest number of deaths. There were 283 deaths from this cause, compared with a decennial average of 233. The year, like the last, was a particularly bad one for pneumonia and broncho-pneumonia. There were 193 deaths from this cause, compared with a decennial average of 141. Bad records were also made by cancer, 197, tuberculosis 164, and Bright's disease 75, which were 37, 23, and 18 above their respective averages. On the other hand, stomach troubles accounted for only 36 deaths, compared with an average of 109. Diphtheria, which was very severe in 1922, moderated in 1923, and was very light for the first half of 1924, though it recurred in the latter part of the year. Total deaths were 20, compared with an average of 36. Influenza attacked in the spring, as in 1923, but more mildly, with only half the deaths that ensued in that year.

The death-rate from tuberculosis was the same as last year, 76 per 100,000, and greater than in any previous year since 1916. The percentage of deaths from tuberculosis to deaths from other causes was 7·7 per cent., and this proportion has certainly increased rather than decreased since 1911. War effects are probably responsible in part, but not entirely, for this check in the improvement in tuberculosis mortality, which was very marked about the beginning of the century.

The number of deaths from cancer (197), and the rate of 92 per 100,000, are both high records. The rate has steadily increased and just doubled in the last 30 years. Cancer deaths were 9·3 per cent. of all deaths—nearly 1 in 10—and the proportion has nearly trebled in the same 30 years.

Infectious Diseases.

There were 1368 infectious diseases notified in 1924, compared with 1905 in 1923. The figures for principal diseases are as follow:—

	Cases Notified.		
	1924.	1923.	1922.
Typhoid	78	109	305
Scarlet Fever	376	615	598
Diphtheria	597	937	2055
Phthisis	235	173	240
Syphilis	61	47	121
Puerperal Fever	14	8	22

There were 14 deaths from whooping-cough, against nil in 1923. Eleven of these deaths occurred in the last four months of the year. There were 20 deaths from diphtheria, against 32 in 1923.

Marriages.

The number of marriages in 1924 was 1529, against 1592 in 1923 and 1674 in 1922. The marriage rate (7·12) was the lowest since 1918.

In general, in the following tables births occurring in Hospitals are allocated to the districts in which the parents reside; and deaths in Hospitals are treated similarly. This, however, does not apply to the table on page 8, which records the actual number of registrations in each district. The rates for previous years, when marked (*a*), are rough estimates, calculated so as to be fairly comparable with the figures for 1922, 1923, and 1924.

BIRTHS, DEATHS, AND NATURAL INCREASE—FOURTH QUARTER, 1924.

	Births.			Deaths.			Increase, 4th Quarter.			Increase, 12 Months.		
	M.	F.	Total.	M.	F.	Total.	M.	F.	Total.	M.	F.	Total.
Urban Districts	236	256	492	131	101	232	105	155	260	489	554	1043
Country Districts	445	429	874	172	114	286	273	315	588	1034	1183	2217
Tasmania	681	685	1366	303	215	518	378	470	848	1523	1737	3260

The annual rate of increase for the State for Fourth Quarter was 15·76, and for the 12 months 1924, 15·18, against 16·35 in 1923, 17·78 in 1922, 16·67 in 1921, 17·61 in 1920, a war-time average of 17·97, and a pre-war average of 19·45.

TRADE: INTERSTATE AND OVERSEAS.

REPORT FOR 1924-25.

(Figures in parentheses are those for corresponding periods of 1923-24).

For the year 1924-25 Imports were valued at £8,808,000 (£9,809,000), a decrease of £1,001,000, or 10 per cent. Direct Oversea Imports accounted for £1,681,000 (£1,8 7,000), or 19 (18) per cent. of Imports and Interstate Imports for £7,127,000 (£7,991,000), or 81 (82) per cent. of the total.

Exports for the year were valued at £8,848,000 (£8,844,000), a slight increase of £4000 being shown. Direct Oversea Exports, £3,306,000 (£2,675,000), show an increase of 24 per cent. and represent 37 (30) per cent. of total Exports. Interstate Exports decreased by 10 per cent.

THE TRADE POSITION.

In order to obtain a measure of the balance of visible trade the above figures must be subjected to some adjustment. The values of Direct Oversea Imports, in accordance with the usual practice, do not include customs duties paid, but the Interstate Imports of necessity include duties paid in the case of re-exports from oversea, and excise in the case of some goods of Australian manufacture. The question of the exclusion or inclusion of customs duties in the case of a Federal State is a difficult one, and is bound up with the whole question of Commonwealth payments to Tasmania and receipts from Tasmania. This aspect will be dealt with separately as part of the general balance of payments to and by the State. For the present purpose of obtaining a measure of the balance of visible trade comparable with other years, the best course would probably be to subtract from the Interstate Imports the duties and excise paid on them in other States. This amount, however, cannot be ascertained with any certainty.

The alternative is to add to value of the Direct Oversea Imports the duties paid on them. This amount can be accurately obtained and is moreover a smaller correction than the other. No comparison is of course possible for the period 1910-22, when no record of Interstate Trade was kept. But for the "book-keeping" period 1900-09, a fair comparison can be made by adding to the published figures for Oversea Imports, both direct and *via* other States, the duty actually paid on them, for which accurate figures are on record.

Using these adjusted totals we get the following results :—

	Imports and Duty.	Exports.	Excess of Exports.
	£1000's	£1000's	£1000's
1900-04 (average)	2704	2927	223
1905-09 (average)	3448	3799	351
			Excess of Imports.
1922-23	9376	7985	1391
1923-24	10,128	8844	1284
1924-25	9090	8848	242

The comparison of Imports with Exports is as follows :—

	Imports with Duty as Percentage of Exports.
1900-04	92·4 per cent.
1905-09	91·8 ,,
1922-23	117·4 ,,
1923-24	114·5 ,,
1924-25	102·7 ,,

There was therefore a large favourable balance of visible trade from 1900 to 1909. When the record is taken up again in 1922, a very large adverse balance is seen for two years, which decreased very strongly in 1924-25 to less than 3 per cent.

The great excess of imports in 1922-24 is accounted for by heavy Government borrowing and private investment of capital from other States or Oversea, but a full interpretation cannot be given without an analysis of the changes in payments made to and by the Commonwealth Government, as well as in tourist expenditure and a number of minor items. The reduction of the adverse balance in 1924-25, as will be seen from detailed consideration of Imports, may be fairly ascribed to reduced capital development, coupled with general economy in consumption.

TRADE OF PORTS.

The total trade is shared among the various ports as follows :—Hobart 55 (52), Launceston 29 (28), Burnie 6 (7), Devonport 5 (6) per cent. respectively, the remaining ports accounting for 5 (7) per cent. All ports show a decrease of trade for the year. Generally Imports have decreased more than Exports. In the case of Hobart and Launceston, Exports have not decreased at all, but show tangible increases. The decreases of total trade at each port are as follows :—Hobart 1 ; Launceston 3½ ; Strahan 9 ; Smithton 9½ ; King Island 9½ ; Burnie 17 ; Stanley 18½ ; Devonport 25½ ; Ulverstone 40 per cent. respectively on the corresponding figures for last year. The aggregate trade of Tasmania shows a decrease of 5 per cent. Interstate Trade decreased by 10½ per cent., but direct Oversea Trade increased by 11 per cent.

IMPORTS.

The Imports, with a drop in value of 10 per cent. compared with 1923-24, show generally evidence of decreased purchasing power and curtailment of general expenditure, together with a falling off of capital expenditure and industrial development.

Imports of food, £1,738,000 (£1,720,000), show a small increase of 1 per cent. Nearly all of the items, particularly of the less essential foods, show, in fact, a decline, but this is masked by an increase of nearly £80,000 in wheat and flour, due entirely to higher prices. Practically the whole of our bread stuffs are now imported, equivalent to something over 1,100,000 bushels of wheat annually. Tasmanian production is barely enough to feed our poultry and provide some 800 tons of special flour for export. The value of imported wheat averaged 6s. 4d. per bushel. Imports of alcoholic liquors, £225,000 (£218,000), have risen a little on account of an increase of £14,000 in beer imported, partly offset by a general decline in spirits.

Tobacco, £303,000 (£305,000), shows a small drop. An increase in tobacco proper is more than balanced by a drop of 25 per cent. in cigars and cigarettes.

The live animal class, £267,000 (£284,000), owes its decline to a falling off of 15,000 in the number of sheep imported. "Animal substances" were unchanged at £142,000. The chief item of this class of imports is the rather unexpected one of wool to the value of £129,000, which, this year, comes principally from New Zealand, whereas in 1923-24 it was mostly Australian. The quantity imported was nominally smaller in 1924-25, but the greater proportion of scoured wool kept the value the same. It is understood that these importations by Tasmanian manufacturers convey no reflection on Tasmanian wool, but are merely the solution of the problem of not buying stocks before they are wanted.

"Clothing and Textiles," £1,598,000 (£1,815,000), gives the clearest evidence of general economy with a decline of £217,000 or 12 per cent. Boots and hats remain unchanged, but nearly all other items, both of clothing and piece-goods, show a decline. The greatest drop is in the general class of apparel which is less by £155,000, or 20 per cent., than in 1923-24. One curious and very marked decline is in chaff-bags, £9000 (£50,000), due to a combination of large original stocks, a small harvest, and the economical use of old bags instead of new ones.

Oils, £350,000 (£336,000), are, as might be expected, an exception to the general rule of decreases. Though the increase in motor-cars is less than in 1923-24, it is still a substantial increase and means increased petrol consumption. Imports increased in quantity from 1,863,000 gallons to 2,456,000 gallons, an increase of one-third, but some of this has probably gone to increase stocks. Values, £184,000 (£172,000), do not show so great an increase, on account of a much larger proportion coming direct overseas in bulk at a much lower value than the cased importations from the mainland.

Paints and varnishes, £48,000 (£59,000), show strongly the prevailing decrease. The more important class of stone and ores, £820,000 (£834,000), is little changed. The biggest item of this class is zinc concentrates for electrolytic treatment, which show a slight increase in quantity and decrease in value, £661,000 (£656,000). Coal has also increased in quantity by 6000 tons but decreased in value, £118,000 (£129,000).

Manufactured metals and machinery, £1,676,000 (£2,224,000), show the greatest decline of any class. Machinery which makes about one-quarter of the class has dropped by over one-third. All kinds of machinery show the decline except electrical machinery which has increased by £9000 to £168,000. Motor-cars with their parts, which now account for over one-third of the whole class, show a smaller decline, £612,000 (£681,000). If allowance is made for motor-cars which leave the State, the total expenditure of imports connected with motor traffic may be shown thus:—

Net imports of—	1924-25.	1923-24.
	£	£
Cars and parts	439,000	530,000
Petrol	190,000	172,000
Tyres	55,000	63,000
	£684,000	£765,000

Nearly all the remaining important items of manufactured metals (including wire, bars, and sheets of various metals) show substantial decreases with the exception of tin-plate, £83,000 (£78,000), and tools of trade, £32,000 (£23,000).

Rubber and leather goods have gone down the normal 10 per cent. Wood and manufactures of wood have gone down still more with a considerable drop in imports of timber, £38,000 (£52,000). The earthenware group, £145,000 (£206,000), has declined by 30 per cent., all the principal items showing decreases. In the case of cement, £15,000 (£36,000), the drop is probably due to increased Tasmanian production. The books and paper class, £225,000 (£276,000), have declined nearly 20 per cent. Printed books show no change at £38,000, but all kinds of stationery and paper have decreased.

The decline in the chemical group, £274,000 (£307,000), is due to the drop in fertilisers, £81,000 (£135,000), and this is a matter of local production of superphosphate rather than decreased consumption. Other items in this group show small increases.

Amongst the more miscellaneous groups there are a few increases—musical instruments, £34,000 (£27,000), ammunition, explosives, and photographic material, but most items have decreased. The drop in guns and rifles, £5000 (£47,000), is chiefly an accident of military equipment; but the decline in soap, £43,000 (£67,000), is more difficult to understand.

EXPORTS.

As opposed to the 10 per cent. decrease in Imports, Exports at £8,848,000 have slightly increased. There has been a very marked drop in food and foodstuffs, £2,801,000 (£3,476,000), which is chiefly due to potatoes and fruit manufactures. This is balanced chiefly by increases in wool and zinc.

Butter exports increased in quantity by 2500 cwt., but owing to lower prices the value dropped from £185,000 to £169,000. Imports of butter amounted, as in 1923-24, to about one-third of the quantity exported, bringing the net exports in value down to £101,000. Cheese, fish, and crayfish all fell away appreciably, but bacon increased, and net exports were valued at £16,600 (£6500).

Potato exports were 54,000 tons (68,000 tons), but owing to low prices the value was only £345,000 (£747,000). Most kinds of agricultural produce show considerable decreases, both in quantity and value—oats £100,000 (£135,000), chaff £59,000 (£100,000), and peas £108,000 (£137,000). Most of the chaff exports last year went to New Zealand. Only 9000 bales of hops were exported compared with 11,000 in 1923-24, though the crop showed no deficiency. The value fell still more, from £280,000 to £217,000.

Apple exports are made up of the oversea shipments of last season, with a good proportion of the interstate shipments of the previous season. The latter contribution accounts for a small falling off in quantity, 1,837,000 bushels (1,878,000 bushels), but the higher level of English prices brought an increase in value, £694,000 (£541,000). Pears, however, declined very seriously in quantity and considerably in value.

All kinds of fruit manufactures fell away equally in quantity and value. The greatest fall was in preserved fruit, £99,000 (£149,000) due to smaller shipments, both interstate and oversea. For pulp on the other hand, while the interstate demand was maintained, oversea shipments were less than half of those in 1923-24, and the total value fell from £262,000 to £203,000. Jams and jellies are predominantly a matter of interstate trade, which declined so that the total value of jam exports fell from £416,000 to £331,000.

Exports of zinc increased by 2 per cent. to 45,000 tons, and with higher prices the value increased from £1,388,000 to £1,573,000. Including other metal products associated with zinc and deducting the value of the raw material imported the value of the net exports of this industry has increased from £860,000 in 1923-24 to £1,060,000 in 1924-25.

Of other mineral products, silver-lead ore £180,000 (£172,000), increased a little in values, with quantity (so far as it can be measured) unchanged. Blister copper dropped from 6600 tons to 5800 tons, and, with prices depressed, the value dropped to £328,000. Tin fell from 976 tons to 898 tons, but with better prices the value rose from £214,000 to £220,000; tin ore, however, at £26,000, dropped by the same amount. Exports of osmiridium were negligible.

Exports of wool were valued at £1,467,000 (£1,180,000). This was an increase of 12 per cent. in the quantity exported, corresponding to the increased clip in 1924-25, and a similar increase in the price realised, giving a total increase of £287,000 in the value of the exports. Sheepskins, £94,000 (£83,000), and hides, £34,000 (£23,000), show increases. Furred skins on the other hand dropped slightly from £264,000 to £251,000, the rise in price not quite balancing the decreased take of skins.

Recent manufacturing developments are reflected in some welcome increases in exports. In confectionery there is for the first time a substantial surplus of exports over imports. Woollen manufactures of all kinds were valued at £254,000 (£131,000), and so have nearly doubled. In cement, the position has changed from net imports of 5500 tons to net exports of 22,000 tons, with a net value of £86,000. Carbide exports, however, at £61,000 show only a slight increase.

Exports of timber were 44½ (47) million feet valued at £557,000 (£591,000), of which only 7 per cent. went oversea. There was a considerable increase in exports of blackwood, both undressed, dressed, and in the log, which were valued at £110,000 (£79,000), and a practically new item appeared in eucalyptus logs at £23,000 (£500). Myrtle on the other hand has droppod in value from £32,000 to £19,000, and there is a considerable decrease in sawn eucalyptus timber £292,000 (£318,000), and in palings £47,000 (£70,000).

One or two of the miscellaneous items are of interest. The movement of "personal and household effects" is due partly to family migration and partly to buying away from home. In 1924-25, the exports increased and the imports diminished, so that the net exports of personal effects increased from £14,000 to £30,000. The movement of samples, again, is some indication of retail trade. Last year samples received decreased in value, and samples returned increased considerably, so that the net imports decreased in value from £59,000 to £38,000.

Hobart, 11th December, 1925.

*Penguin.

† NOTE.—The figures given for each port in the last three tables above do *not* take into account coastal movements of shipping. Ships are recorded as arrivals at the *first* Tasmanian port of call only, and as departures only at the last port of call, in Tasmania. A vessel coming direct to Stanley from Melbourne, calling at Burnie, Ulverstone, Devonport, and Launceston, and leaving the latter port for Sydney, would be recorded only as an arrival at Stanley and a departure from Launceston.

REPORT OF STOCK AND CROPS.

CROPS IN 1924-25.

The area cropped last season was 264,000 acres, or about 15,000 acres less than 1923-24 which was itself a little below the average. The decrease has turned out about 1000 acres less than was estimated last December. Crops have been on the whole disappointing, with the exception of fruit and hops. Prospects at the beginning of December were for better yields than usual on a decreased acreage, but the very dry weather of December and early January were fatal to many crops, and seriously reduced the average yields. A feature of the year was the number of returns showing absolute failure of crops, while other crops in the neighbourhood, more fortunate in their time, gave exceptionally high returns.

WHEAT.

There were 13,000 acres only under wheat, a decrease of 1500 on the previous year. This is only half the average for the last ten years, and just over one-third of the average of the ten years before. The yield of just under 18 bushels per acre is the lowest since 1918-19. Total production, 231,000 bushels, is 74,000 bushels under the previous year, and less than one-third of the pre-war average. The Longford-Westbury district, which contains nearly half of the wheat growing land, returned 14 bushels per acre—a low yield, but not appreciably worse than the average of recent years. Latrobe and Devonport in the north-west had good crops, and in the south-east Richmond and Green Ponds, but Deloraine, Sorell, Clarence, and Brighton were much below their averages.

BARLEY.

The area under barley dropped again, and was only 2600 acres, less than half of the 10 years' average. With a very low yield of 16 bushels per acre, production was only 42,000 bushels.

OATS.

White oats were cropped from 22,400 acres, a drop of 2600 acres. The yield was a little over 22 bushels per acre, or $3\frac{1}{2}$ bushels less than the previous year. The acreage of Algerians dropped by the same amount to 23,750 acres, with a yield of 24 bushels per acre, compared with $26\frac{1}{2}$ in 1923-24. The production of white oats was 498,000 bushels, and of Algerians 568,000 bushels. For all oats both area and yield were 10 per cent. under the average, giving a production of about 20 per cent. under the average of the last 10 years, and 40 per cent. under that of the previous decade. The yields of the largest producing districts of white oats were :—Oatlands, 25 bushels per acre ; Kentish, 23 ; Deloraine, 22 ; Longford, 21 ; and Westbury, only 16. Smaller producers, such as Latrobe and Devonport, returned over 30 bushels per acre. Production of Algerians is much more widely spread, but Longford is by far the largest producer, with a yield of only 19 bushels per acre. Of other districts with a considerable output, the best yields were :—Scottsdale, 33 bushels per acre ; Penguin, 31 ; Richmond and Latrobe, 27 ; and Kentish, 26.

PEASE.

The prospects of pea crops in December are particularly liable to be reversed by dry weather following, and last season the yields were particularly disappointing. The area under grey peas, under the influence of good yields and good prices, has been growing for some years past, and this year was over 15,000 acres ; but the yield dropped from 21 bushels the year before, and an average of 17 bushels for the decade, to $14\frac{1}{2}$ bushels per acre for the past season. Production was 220,000 bushels, compared with 320,000 bushels in 1923-24.

Blue peas at 7700 acres also show some increase in area, but the yield was only 16 bushels, compared with 22 the year before, and an average of 18 bushels. Production was, therefore, down to 123,000 bushels, a drop of 22 per cent.

Westbury, Deloraine, Longford, and Latrobe are the chief districts for grey peas, and all return much the same yield per acre. Blue peas are almost a monopoly of the north-west, particularly Leven and Latrobe, and no district showed much deviation from the general low average.

POTATOES.

The area under potatoes was 36,000 acres, about 1000 acres less than in 1923-24. The yield of 2·3 tons per acre was the lowest since 1916-17, when it went under two tons per acre. Total production, 83,000 tons, was 17,000 tons less than in the previous season. Of the area under potatoes 82 per cent. is in the north-west, and 8 per cent. in the north-east, leaving only 10 per cent to be divided amongst other districts. Of the biggest producers Emu Bay, as usual, had a yield considerably above the average with 5 tons per acre, but Kentish and Leven were well under the average with only 2 tons per acre, while Table Cape and Penguin just struck the average yield.

HAY.

The area cut for hay was 88,000 acres, or 9000 acres less than the previous season, and 6000 acres under the average. The yield was barely 1·4 tons per acre, which is the average for the last ten years. The production of hay was 121,000 tons, a drop of 23,000 on the previous crop, and 10 per cent. under the average. The hay acreage is well distributed throughout the island, except in the fruit districts, and in general there was no great difference of yield between the chief producers ; but Latrobe, Scottsdale, and Brighton are noticeable for good crops.

HOPS.

The area under hops was unaltered from last year at 1500 acres. The yield of 1490 lbs. per acre was slightly below the previous years, but a little over the average. The production of 2,225,000 lbs., or 9674 bales, was 295 bales short of last year, but 15 per cent over the 10 years' average.

OTHER ROOT CROPS.

Turnips were returned from 3000 acres, a drop of 600 acres on the previous year. The production of 16,000 tons was, however, well over the average of the last 10 years, but less than half of the average of the previous decade. Over one-third of the turnips are grown in Circular Head, where the yield of 5½ tons per acre was a little over the average. Mangolds are a declining crop, and were grown on 420 acres only, of which Latrobe accounted for one-quarter. The production of carrots and onions, which has also steadily declined for many years, is now quite insignificant.

FRUIT.

The apple crop, in distinction from most others, turned out better than early indications promised and may be put at 2,210,000 bushels marketed, an increase of 320,000 bushels on the previous season, but only two-thirds of the crop of the year before. The area is practically unchanged at 25,700 acres of trees in bearing, but those not yet bearing have shown a steady decline in recent years. Pears show some falling off from the previous year, and the production was returned at 172,000 bushels, but a good many of these were probably not marketed. Apricots show increased acreage, 1516 acres in bearing, compared with 1425, but the output was slightly less at 106,000 bushels. Plums at 593 acres in bearing also show increased area, but the output of 46,000 was 12 per cent. less than in 1923-24.

GENERAL.

Looking back over the last 20 years there have been substantial, though not enormous, increases in the area under hops, peas, fruit, potatoes, and hay in that order of magnitude. All other crops show a decline, which in the case of wheat and barley has been a reduction to one-third of the average 20 years ago. An examination of yield per acre is even less satisfactory. Hops (which are heavily manured) show a small increase per acre, and fruit a moderate increase, which is, however, largely a matter of older trees. In all other crops there is a marked reduction of productivity, even though with reduced acreage and new cleared land crops should now be more restricted to the most suitable land than they were 20 years ago. Comparing the yield per acre 1914-24 with that of 1903-13, we find the following reductions in yield per acre :—

Wheat	2 bushels per acre less
Barley	3 „ „
Oats	5 „ „
Peas	3 „ „
Potatoes	17 cwt. per acre less
Hay	2 „ „

The reduction of the yield of potatoes in 10 years was actually 25 per cent. The evidence for progressive exhaustion of the soil seems incontestable.

CROPS AND FORECAST.

The estimate of acreage under crop made in December turned out to be accurate in respect to total crops and most of the individual principal crops. There was, however, an under-estimate of potatoes by about 2000 acres, or 6 per cent., balanced by a similar over-estimate for Algerian oats.

Estimates of yield were uniformly too high. The dry weather, which began in December, 1924, and continued to the middle of February, quite upset the prospects as they appeared in December, and actual yields were below the December estimate for every crop by from 10 to 20 per cent.

SIZE OF HOLDINGS (see page 15).

Compared with 1922, there was in 1925 an appreciable decline in the smaller holdings. There has been a decrease in the acreage contained in all classes of holdings under 500 acres, varying from 5 to 10 per cent. A corresponding and roughly equivalent increase has taken place in the area of holdings between 1000 acres and 5000 acres. For the larger holdings decrease in one group about balances increase in another. Compared with 1914 there has been a small decrease in the number and area of holdings under 50 acres ; a small increase in other holdings under 1000 acres ; a very large increase in those between 1000 and 5000 acres ; and a considerable increase in most groups of larger holdings. Holdings under 1000 acres comprise 28 per cent. of all holdings, compared with 29 per cent. in 1914.

FARM WORKERS.

The number of farm workers in 1925 shows a serious decline (Tables p. 16). For women, the drop is probably for the most part the result of a stricter application of the definition of female workers on farms. But for men, the drop is certain. In 1924, there was a decrease of 500 on 1923, and in 1925 a further decrease of 1000, making a total decrease in two years of nearly 8 per cent. This decline of 1500 male farm-workers in two years seems to indicate the ultimate source of our general loss of population in the last two years.

STOCK.

HORSES.

The halt shown last year in the steady falling-off in the number of horses has not been maintained. The foals were 100 more, but the totals show a decrease of 469, which is on a level with the average decline during the past ten years.

CATTLE.

During the past four years cattle have shown a substantial annual increase and now total 225,740. This is 5400 more than last year and 3500 above the figures for 1912, which were the highest in previous years. Calves and "other" cattle, with an improvement of 3700 and 2400 respectively, account for the increase. Dairy cows, heifers, and working bullocks show slight decreases. Milch cows, which were 400 fewer than in 1924, still number some 2400 above the average of the past five years, and stand 48 per cent. above the total in 1916. The total increase in cattle is more satisfactory in view of the facts that 2400 more were slaughtered than in the previous year and that the imports had not materially altered.

SHEEP.

In the middle of 1925 sheep totalled 1,614,000, which is 56,000 above the number in the year before and the highest since 1920, but is 43,000 below the average of the previous ten years. Compared with 1924, ewes numbered 695,000, against 673,000, and 40,000 more were put to ram. The improvement in numbers is not due to imports, as 14,000 fewer sheep were imported than the previous year's figures showed, but is due in part to the falling-off of 39,000 in the sheep slaughtered.

PIGS.

Pigs numbered 200 more than in the year before, but are still well below the records for 1917 or 1918.

MISCELLANEOUS.

Other items dealt with in previous reports show no change which would call for special comment. The comments then made still hold.

VALUE OF PRODUCTION.

	1923-24.	1924-25.

NOTE.—The percentage in the last column is designed to give an approximate measure of the proportion of farming and pastoral land excluding Crown leases and licenses, that is rented from the owner. Share farms are left out as being intermediate in their nature. The figure given is the percentage of rented land to the total made up of rented land, freehold occupation, and Crown land in process of purchase on time payment.

*Including Sinking Funds and Expenses, and based upon average rate payable on Public Debt and upon the proportion of loans expended (except in the case of Hydro-Electric Works and steamships—actual interest); but not including interest on Soldier Settlement, Closer Settlement, or State Advances Loans.

(*a*) Interest on loans for Post and Telegraph, Defence, Immigration, aid to revenue, less revenue from transferred properties.
(*b*) Including Engineering School, £2095. (*c*) Includes Carbide Works, £22,787, and Taxation Department, £25,525.
(*d*) Exclusive of £12,486, granted by Commonwealth Government for expenditure on Roads during 1924-25.

APPROXIMATE NET COST OF STATE FUNCTIONS

For Years 1890, 1900, 1910-11, *and Quinquenniad ended in Year* 1924-25.

(In this comparative Statement it is endeavoured to show approximately the Net Cost of each specific Function after distributing the Calculated Proportional Share of Interest and Sinking Fund against Particular Services, *less* the Amount of Earnings for Services actually rendered.)

Note.—Cost of raising loans is not included in Loans Expenditure, but is shown as the difference between the "net moneys raised" and the amount of securities issued—and is apportioned, from year to year, between separate items, in the ratio which the amounts raised for the respective items bear to the whole raisings for the year. * Includes charges formerly shown separately, under items—"Public Works," "Roads and Bridges," and "Miscellaneous." † Of this amount £26,000 was from sale of ships, and £30,546 from depreciation, but the balance, of £71,103 (loss) was not redeemed but merely transferred to Suspense Account, to be repaid out of revenue over a period of years. — Indicates *minus*.

NOTE.—Income Tax is collectable for the calendar year, and since 1911 is based on the income for financial year (called in this table assessment year) ending six months before commencement of that calendar year. The analysis given in the Commissioner's Report refers to the tax for the calendar year preceding the one in which the report is issued, and which, consequently, is based on income for financial year 24 months before date of report.

COMMONWEALTH TAXATION.

TAXES collected in Tasmania by Federal Government.

Tax.	1924-25.	1923-24.	1922-23.	1921-22.	1920-21.	1919-20.	1918-19.	1917-18.	1916-17.	1915-16.

Customs and Excise (*c*)	1,130,900	1,117,200	1,047,200	895,800	1,038,500	707,600	576,600	434,900	514,300	556,500

(*a*) Collections at the Central Office (which for the whole of the Commonwealth amount to approximately one-third of the Total) are not included.

(*b*) Actual collections in Tasmania. The amount of duty collected in the other States of the Commonwealth on goods transhipped to Tasmania is not included.

(*c*) Figures based on the assumption that the Customs and Excise Revenue per head in Tasmania, from 1913 onwards, bore the same proportion to the Customs and Excise Revenue per head for the Commonwealth that it did on the average for the nine years 1901 to 1909, for which years only full information is available. (The average per head, 1901 to 1909, in Tasmania was approximately 82% of the average per head for the Commonwealth.)

CLOSER SETTLEMENT AND SOLDIERS' SETTLEMENT—YEAR ENDING 30TH JUNE, 1925

FRIENDLY SOCIETIES.

FRIENDLY SOCIETIES: REPORT OF THE STATISTICIAN FOR THE YEAR 1924.

Hobart, 1st October, 1925.

SIR,

IN accordance with the provisions of "The Friendly Societies Act, 1888," I have the honour to furnish the following report with respect to the year 1924:—

Societies.

There are 20 distinct societies registered under "The Friendly Societies Act" carrying on operations in Tasmania. Of these, 14 are known as ordinary or "general" societies, and 6 as miscellaneous or "special" societies. The former have 184 branches throughout the State; but the latter, being mainly organisations composed of the employees of one firm or institution, or residents of one locality, have no branches. The aims and objects of both classes of societies are fairly identical, but the benefits are somewhat different. Compared with the previous year there was no change in the number of societies, but the number of branches shows a falling off of 6. Most of the "general" societies have both male and female branches, but only two have branches for juveniles. As the particulars with respect to juveniles are only of minor importance, they are shown separately in the attached tables, in order that the positions of "adults'" lodges may be gauged from year to year.

Returns and Information.

A copy of the printed report and tables showing the operations and state of finances of each and all of the societies was duly forwarded to each district secretary and to others on application. There was more than an average demand for these reports during the last two years, stimulated probably by the fact that a Royal Commission had been inquiring into the question of national insurance, and it was considered that the finding of that commission might materially affect the future of friendly societies.

Owing to the frequent changes of secretaries, particularly in rural lodges, the difficulty in getting complete and satisfactory returns still continues. It is a pity that secretaries do not realise that the information asked for in the returns is absolutely necessary for the purpose of providing data on which to base future policy in respect to dues and benefits.

Membership.

During the year the total membership has decreased by 250. Of these, however, juveniles accounted for 153, and females for 48, while the decrease in "adult" males numbered only 49, or about 2 in every 1000. The yearly increase in the pre-war years, 1909-13, was 33 per 1000, and in the post-war years, 1918-23, it was 21 per 1000. In 1923 the rate of increase rose to 39 per 1000, so that the decrease in 1924 of 2 per 1000 is very marked. The actual decrease of population in 1924 compared with 1923 was about 3 per 1000, so that in proportion to population the societies were holding their own even in 1924. The initiations in "adult" male lodges numbered 1495, or 6·6 per cent., and the departures by arrears 1319, or 5·4 per cent. About 5·3 per cent. of all benefit members were unfinancial at the end of 1924, against 4·8 in 1923.

Receipts.

Receipts from all sources totalled £112,136, which is £3516 above the amount received the last year, £12,976 more than the average of the previous five years, and is equivalent to £4 17s. per financial member. Of this sum, £79,406 was derived from contributions and levies, an increase of £1727 on the 1923 figures, and £6882 above the annual average for the period 1919-1923. Excluding juveniles the average payment per financial member was £3 9s. 1d., against £3 7s. 5d. in 1923, £3 0s. 1d. in 1914, and £2 14s. 10d. in 1908. Except in the case of death allowances there are no corresponding benefits to compensate for the increased contributions since 1908. Interest realised £17,608, or £1088 more than in 1923, and is equivalent to a return of £5·78 per cent. on invested capital. This is easily the best rate that has been secured, and although it is only 0·14 per cent. better than in 1923, it is 1·65 higher than the rate in 1915, and 2·21 above the rate obtained in 1911.

Revenue for the year showed a margin of £11,412, or 11·33 per cent. over expenditure, against 12·50 in 1923. This is not as good as the annual average of 1911 to 1915—the pre-war period—by 3·44 per cent., and is worse than the average of 1920-23 by 2·58 per cent., but is 1·83 above the 1916-20 period.

The accumulated funds have increased from £315,367 to £326,515 during the year, or about 3·53 per cent., and 0·35 below the average of 1920 to 1923. The funds are equivalent to £14 2s. 5d. per financial member, against £13 8s. 8d in 1923.

Expenditure.

In 1924 the expenditure was £4844 more than in the previous year, which is equal to an increase of 5·1 per cent. The growth in each year from 1921 to 1923 equalled 2·4, 4·2, and 8·5 per cent. respectively. Compared with 1923, disbursements in 1924 show an increase for administration of

£489 for medical attendance and medicine of £556, for deaths of £3648, and for "miscellaneous" of £632, whilst the amount distributed in sick pay shows a falling-off of £481. Except in the case of death claims, the increases, though decidedly upward in tendency, are not serious, though in view of the decrease in membership no increase in expenditure was to be expected. Per financial member the payments for administration have risen from 14s. 1d. to 14s. 9d., for medicine, &c., from 22s. 10d. to 23s. 8d., for "miscellaneous" from 8s. 7d. to 9s. 3d., and for all expenditure from 81s. 9d. to 87s. 6d. In 1924 the expenditure was £100,724, against £65,189 in 1912, equal to an increase of 54·5 per cent., the membership in the same years was 24,410 and 22,480 respectively, an increase of only 8·6 per cent. The total expenditure for financial members in 1924 was £4 7s. 2d., and in 1912 only £3 2s. 2d.

Death claims amounted to £18,772, and accounted for 18·6 per cent. of total expenditure, which is exactly equal to the annual average for the period 1919 to 1923. The payments per case for deceased male members in "general" societies averaged £71 13s. 4d., which is £1 3s. 4d. above the amount for 1923, but £2 14s. 2d. below the average for the five-yearly period 1919 to 1923.

When compared with the pre-war period (1911-1915) the expenditure per financial member shows the following percentage increases, viz., medical expenses, 31; sick pay, 22; funeral benefits, 47; management, 34; and all expenditure, 33; while in the same period contributions increased by only 16 per cent., and all revenue by 29.

Sickness and Mortality.

Sick experience has been slightly more favourable than in the previous year. The number of cases shows a falling-off of 487, or 9·7 per cent., but the average time per case increased, so that the total duration of sickness decreased from 39,854 to 38,889 weeks, or only 2·4 per cent. In the case of adult financial males illness averaged 10·3 days each. This is slightly (0·2 of a day) better than last year, but compares unfavourably with all other years since 1919. Illness was less prevalent amongst females than males. It averaged 8·2 days per financial member, which is slightly over the average of recent years.

During the year 261 members died, of whom 249 were adult males, and 12 adult females, against a total of 199 last year, and an annual average of 213 in the period 1919 to 1923. The death roll is easily the highest since 1919, when the total (partly through delay in registration of deaths at war) was 2 more. Amongst adult males the rate of mortality per 1000 financial members was 11·5, compared with an average rate of 9·2 per 1000 for the preceding four years. Amongst adult females it was also higher than in any year since 1919, and was 3·7 per 1000 above the average for the previous ten years. There was nothing in the general health conditions of the community to account for the unusual mortality, for the general death rate in 1924 was almost exactly the same as the average for the preceding four years.

Valuation of 1922.

The revenue and expenditure figures given above do not promise any amendment of the bad financial position in which most of the societies were shown to be by the valuation of 1922. But for the very big rate of interest earned by accumulated funds the year's balance would have been very unsatisfactory. During the last year more serious consideration has been given to the matter by most of the societies, and some have gone as far as is wise for a first step at financial amendment; but many have taken as yet no effective step, and ther inertia hampered the forward movement of the rest. In view of the uncertainty as to the immediate future of national health insurance, the question of new friendly society legislation had better for the present be postponed.

The usual statistical summary will be found in the Tables 1 to 7 which follow, and more detailed information in the ensuing pages.

L. F. GIBLIN,
Government Statistician.

NOTE.—In years 1915 and 1916 the receipts include moneys which were found to be Trust Funds which should have appeared as transfers. The capital shows these funds (some £6000 in 1915 and £3725 in 1916) in duplicate, in addition to details shown in these two years respectively.

* Deducting cross entries, £1190 in 1905, £388 in 1906, £505 in 1907, £706 in 1908, £391 in 1909, £430 in 1910, £1334 in 1911, £706 in 1912, £1899 in 1913, and £1192 in 1914. In 1915 and onward for cross entries, see annual detail.

† Juvenile Lodges not included.

§ Capital of Lodges closed during year 1914, £45.

‖ Excluding value of Dispensary Stock on hand in 1913, £685; in 1914, £1588; in 1915, £1491; in 1916, £1744; in 1917, £1981, in 1918, £2403; in 1919, £2871; in 1920, £3060; in 1921, £3558; in 1922, £2986; in 1923, £3262; in 1924, £3526.

‡ In 1920 and onward "Consolidated Sick Funds" and "Juvenile Funeral Funds," &c., which appear in District Returns for respective years in "Other Funds," are included in this column.

[Compiled by Government Statistician from Returns furnished by the Secretaries of the various Lodges.]
